

Conservation's Too Slow (2015 Version)

tune: when I'm 64 (Beatles)

lyrics revised by Madison Raging Grannies

What will we **do** now, where will we **go**, when **polluters** pre-vail?
Don't you **know** that **fossil** fuel has **got** to go, and our conservation's too slow?
How can we **wake** our Senators **up**, **before** it's too late?
Grannies and students, all of Earth's people, we **must decide** our fate.

Climate change is here 00-00
Dangerous to deny
Science makes it clear!

Industry **billions** buy political power, oh **their** money speaks!
But our **children count** on us to **do** what's right, seven generations **kept** in our sight
That **carbon** we're **burning**, polluting our **air**, **too** much C O 2
Can we stop **mining**, can we stop **fracking**, **Life** depends on **what we do**

Climate change is here 00-00
Dangerous to deny
Science makes it clear!

What will we **do** now, where will we **go**, **before** it's too late?
We must **value** people over **profit** now, keep the planet **livable**, we **need** that and how.
Renewable power, **care** for the **land**, change **congress** we vow,
Grannies and students, all of Earth's people, save our planet now!
