

Our Favorite Things

Tune: My favorite Things from the Sound of Music

Lyrics: Sheila Plotkin

Clean air and water are precious and fleeting
Mining and fracking give them both a beating
Earth cannot make it if we clip her wings
This planet is one of our favorite things. ↓

Voting that's easy and fair and inclusive
We can't allow them to make it exclusive
Ballots should come without trapdoors and strings
Voting is one of our favorite things. ↑

CHORUS: On the far right/ common sense blight
Where corruption rules
We know what they're up to and what they're about
Cuz Grannies are no one's fools.

Women are grownups with health care decisions
Toss out the right wing/ pompous revisions
Banish the old ways to which The Right clings
Women are one of our favorite things. ↓

Our social contract will soon be in tatters
Health care and schooling are **not** private matters
America needs what the public good brings
People are one of our favorite things. ↑

CHORUS
